

# M.O.L. ROMGUM

M.O.L. ROMGUM is a significant manufacturer of rubber seals and rubber products, mainly focusing on rubber seals for sewage and water pipes. We specialize in the design, manufacture and supply of a wide variety of gaskets and sealing materials, which are indispensable in many industrial and construction sectors.

## High-Performance Rubber Seals for Water & Wastewater Systems

Rubber gaskets are encountered wherever there are joints designed to prevent liquids or gases from entering. We have been in the rubber gasket market for **more than 30 years** and guarantee repeatability and stability of production.

We take an individual approach to each order. Based on the guidelines we receive from you, our Design Department will adjust the shape, material of the rubber products and the way they are made. Our primary goal is to meet customer expectations by offering **solutions tailored to your needs**.

All our products comply with **ISO 9001:2015** standard. Our portfolio includes gaskets that meet standards in accordance with the **KOMO® quality certificate**. We also offer gaskets for contact with **drinking water**.

## Why Choose Us?

### 30+ Years Expertise

We have been in the rubber gasket market for **more than 30 years**.

### Customized Solutions

We take an **individual approach** to each order to create solutions that will fit your needs.

### Certifications

- ISO 9001:2015
- KOMO® certification
- Drinking water contact approval
- EN 681-1 testing compliance

### Availability

We are a significant manufacturer of rubber seals and rubber products in **Europe**.

# APPLICATION DETAILS

Our sealing solutions are used across the full water and wastewater cycle, supporting both municipal and industrial infrastructures. Whether installed in pressurized drinking water networks, domestic sewer systems or stormwater management pipelines, our rubber gaskets ensure long-term tightness and durability.

## Application Areas

**Pressure Water Supply Systems:** Our seals are widely used in pressurized drinking water networks, where stable sealing performance is essential for maintaining consistent flow and preventing leakage.

**Tanks, Manholes & Treatment Facilities:** For wastewater treatment plants, septic tanks and manholes, our IN SITU seals provide flexible and watertight side-wall connections.

**Industrial Water Handling & Special Applications:** Industrial facilities often deal with aggressive media and elevated performance requirements. Our products can withstand chemical exposure, temperature variation and mechanical loads commonly found in industrial water processes.

**Domestic Sewer & Drainage Installations:** In gravity-flow sewer and indoor/outdoor drainage systems designed to work seamlessly with PP and PVC sewage systems used in residential and commercial buildings.

**Stormwater & Surface Water Management:** Stormwater systems require sealing solutions that can withstand high flow variations and external loads. Our products support both corrugated and smooth-wall pipe designs commonly used in drainage, road infrastructure and large-scale rainwater handling installations.

*Shaped for your success*

We are not limited to products showcased in this leaflet. Browse our website and contact us to learn more about what we can offer. Our experts will be happy to develop solutions to match your needs for specific applications and quality. Every development is special and uniquely tailor-made for our customers.

Since 2026, M.O.L. ROMGUM is a part of Sigma Polymer Group.
